

How You Can Perform the Modern Eddington Experiment in 2024

-2017 23 plates 42 stars Einstein Coefficient 1.68

-2024

4 teams with 4 telescope/camera stations- 12 students, 4 faculty and 4 experienced observers.

Recruiting now for up to 12 teams

Telescope-camera station \$12-15k

Research site El Salto MX at the point of max eclipse and directly on centerline, 8000' elevation, very slight chance of clouds, very impressive private villa with room and board, satellite TV and internet for 50 or more people.

Opportunities for NASA funded equipment and student support.
