

5 THINGS TO MAKE OR BREAK YOUR ECLIPSE PLANS

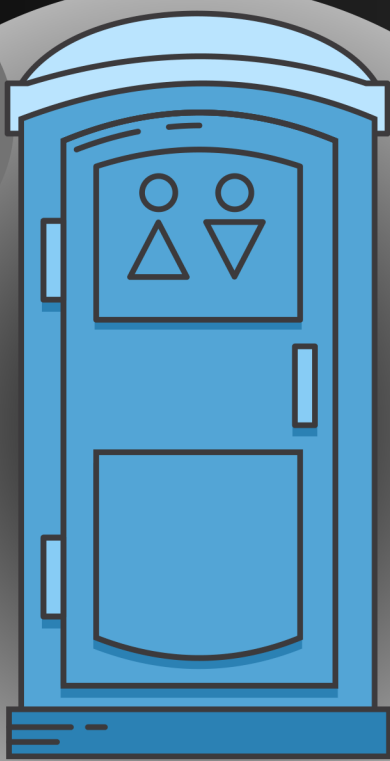

Travel & Transportation

Plan and clearly mark traffic flows to, from, and around events. Consider one-way traffic flows in areas of potential congestion. Readerboards and signage will help steer people to events and information.

1

2

Toilets

Adequate toilet and handwashing stations are a **must** at events, campsites, and gatherings. Assuming 24hr use, like a campsite/campground, the rule of thumb is 1 toilet to 10 people ***if serviced every day***. Daily service will likely **not be possible**, so factor that into your ordering.

Trash

The average campsite (3-4 people) will fill a 33gal trash bag in a weekend. Plan for additional dumpsters and service runs. Look into recycling and composting options if possible, and make sure they're clearly marked.

3

4

Collaboration

"Many hands make light work." Engage far and wide in your planning process and bring as many people/organizations to the table with differing experiences and perspectives as possible. Bias toward including vice excluding.

Communication

Advertise your plans and events across multiple media: print, radio, and internet. Consider hashtag campaigns particularly for important messaging items such as travel, major event, and safety information.
