The Main Event!
Monday, 8 April, 2024
The statements made herein reflect the best effort of Dan McGlaun, the presenter of this presentation (the “Presenter”) to offer in good faith, suggestions for event planners and scientists in organizing, planning, educating, and otherwise hosting eclipse-viewing activities for the annular solar eclipse of October 14, 2023 and the total solar eclipse of 8 April 2024 (collectively, the “Events”); these statements are intended to be anecdotal rather than consultative, based on the Presenter’s actual experience in having successfully observed a large number of solar eclipses. The Presenter, and eclipse2024.org, along with their sponsors, business partners, vendors and suppliers, and heirs and assigns, cannot be held liable for weather, or for actions of any third party, and will therefore not accept responsibility for personal injury, property damage, lost revenue or any other damage or alleged damage, resulting from the actions or inactions of any person or organization with regard to the Events. Persons participating in the Events are advised that this participation, as well as planning for the Events (including the acquisition of knowledge through this presentation or from the Presenter at any time) requires that they agree to hold harmless both the Presenter and Eclipse2024.org, and their sponsors, vendors and suppliers, heirs and assigns, from any and all legal action and/or claim for damages of any kind, which result or are alleged to result from such participation and/or preparation.

PARTIAL ECLIPSE, TOTAL AWE

State Catches Eclipse Fever

BY VANDERA DE LA TORRE
vandera@courant.com

HARTFORD — Mother didn’t think... at first. She-... cut an office window, driving downtown to gawk at the 11:15 a.m. eclipse. But shorty after 2:20 p.m., a crowd gathered outside of Hartford’s insurance towers. Two-year-old Solomon raised NASA-approved glasses to her dad and uncle’s faces. “I can’t believe that’s real,” she said.

BUDGET IMPASSE

Nearly without a state budget, “if everyone wasn’t paying attention before, in West Hartford, everybody is paying attention now!” said Rep. Derek Slap of West Hartford. “I’m very frustrated that the families, towns, and businesses are still in limbo, and yet we’re approaching September. They don’t care if there’s a bill or if it’s after our paychecks. They want a resolution to this.”

The potential loss of millions of dollars in state revenue has generated concern among residents of communities. Overall, the towns could see a combined $18.4 million in state aid, which is significantly lower than previous years.
SIGHT TO SEE

Thousands view celestial event in Stark

By Amy L. Knapp
Gannett News Service

JACKSON TWP. — What better way to finish out summer than by enjoying a once-in-a-lifetime event? That’s exactly what Scott Martin did. The 16-year-old Jackson Township teen spent Monday afternoon gazing at the sky with his father John.

“This doesn’t happen every day,” the soon-to-be Malone University freshman said. “I’ve never experienced anything like this, that I remember. It’s a great way to end the summer.”

Across the United States, millions turned their gazes upward to experience a total solar eclipse. From Lincoln City, Ore., — the first in the continental U.S. to see the total eclipse — to the folks on the East Coast just after 4 p.m., it was an experience many have been counting down the days to see.

ALL EYES SKYWARD

Ashland eclipse viewers gather to watch the celestial event. A3
Eclipse2024.org has all the standard eclipse education and eye safety information, PLUS these unique features:

**ECLIPSE VIEWING INFORMATION**
- Eclipse viewing blogs
  - Available for 75 major regions along the path
  - Eye safety
  - Travel considerations
  - Select local viewing locations
  - Interactive map showing eclipse times and phases
- The perfect place for everyone to plan eclipse viewing!

**ECLIPSE SIMULATOR**
- Incredibly realistic eclipse simulation
  - Shows the 2023 / 2024 eclipses from any location
  - Realistic prominences and chromosphere
  - Full-disk Bailly's Beads (generated with URO data)
  - Sun / Moon outlines
  - Stars and Planets
  - Sunrise / Sunset effects
  - Eye Safety warning
  - Library of foregrounds and coronas
  - Many other realistic details!
  - (Contact Dan for a personal tour of all the features)
  - *2023 Annular* Total eclipse now also available!* 

**ECLIPSE SIMULATION VIDEOS**
- The easiest way to preview the eclipse!
  - Extracted from the Eclipse Simulator
  - 22/200 cities in North and Central America
  - 2023 and 2024 eclipses are included
  - Now available for viewing on YouTube
- Eclipse sequence videos are available for official use by Educators / Tourism / Government / Media (Attribution required)
- Search directly in YouTube - OR - Visit the Eclipse2024.org video landing page
- Searchable city list / Detailed selection map

**LOCAL ECLIPSE CIRCUMSTANCES**
- Collection of location-specific eclipse information
  - Celebrating the eclipse viewing experience of EVERY locality in North America!
  - Complete 2023 and 2024 eclipse circumstances
  - 140,000 cities in North / Central / South America
  - Links to maps, blog posts, simulator, videos and community information.

**COMMUNITY PAGES**
- FREE resources for official community plans
  - ALL 140,000 communities have a community page!
  - Back by popular demand from 2017
  - Communities can host eclipse-weekend plans COMPLETELY FREE!
  - 2023 and 2024 eclipse sections
  - NOT just for cities in the path!

All of the above resources are summarized for your community in one convenient location! Visit EclipseResources.Solar to find YOUR community's information and resources!

KEEP CALM AND ECLIPSE ON
OUR MOMENT IN THE SUN

By Mary E. Land

The eclipse of the heart and soul turned last Monday again for the people of St. Louis, and millions who looked in wonder watched the moon and the sun.

Millions of South African viewers watched through special glasses, and people lined up to enjoy the solar eclipse. In South Africa, the annular eclipse was not as dramatic as in other parts of the world.

Protests of students could be heard at the moment of total darkness, and crowds cheered. They chanted as they walked, some people wept. The weather was fair, and the sun set as the eclipse began.
