# Cosmic coincidence

**TOUT THE COSMIC MATH**

The Sun's diameter is 400x the Moon's diameter, but the Sun is also 400x farther away from Earth!

**SAFETY! SAFETY! SAFETY!**

**Do Not Look Directly  
at the Sun!**

**Eclipse glasses  
*Not sunglasses!***

## PAPER ECLIPSE GLASSES

Eclipse Shades™ are absolutely safe for direct viewing of solar eclipses and transits. Made by Rainbow Symphony, recognized by NASA as producing certified safe eclipse glasses and viewers.

\$0.45 - \$1.95 ea. (min. order of 10)

## PLASTIC ECLIPSE GLASSES

Just as safe as the paper Eclipse Shades™, but with a plastic, wrap-around frame. Made by Rainbow Symphony, recognized by NASA as producing certified safe eclipse glasses and viewers.

\$14.95

## HAND-HELD VIEWER

Don't want to wear glasses? Use this hand-held viewer to safely see the Sun. 3" x 5", with a 1" x 4" aperture. Made by Rainbow Symphony, recognized by NASA as producing certified safe eclipse glasses and viewers.

\$0.45 - \$1.95 ea. (min. order of 10)

## LAMINATED VIEWER

The Solar Shield™ is larger and sturdier than the regular hand-held viewer. 8.5" x 5.5", with a 2" x 4" aperture. Made by Rainbow Symphony, recognized by NASA as producing certified safe eclipse glasses and viewers.

\$4.95

Astronomy Picture of the Day - Sept. 15, 1999

The sun's glorious corona is composed of hot, rarified plasma with a temperature of 1 to 2 million degrees Centigrade. It is only visible during a total eclipse when the Moon hides the Sun's brilliant disk.
