SIU Practice Events

May 15, 2022 lunar eclipse
Aug 6, 2022 star party
2023 SIU Star Party

The background of the poster is a dark, starry night sky. A series of moon phases are depicted in a diagonal line from the top left to the bottom right, starting with a full moon and ending with a new moon. In the center of this sequence is a large, glowing red moon, representing the total lunar eclipse. At the bottom of the poster, there is a silhouette of a crowd of people looking up at the sky, with some colorful, abstract shapes representing stars or galaxies.

TOTAL LUNAR ECLIPSE

Sunday, May 15, 2022
7:30 p.m. - Midnight

JOIN US FOR A FREE NIGHT OF
SCIENCE FUN AT SALUKI STADIUM

Do's and Don'ts:

- Start planning your event with your public safety team and your events planning team.
- Give police, EMS, & hospitals time to assess, plan and arrange funding. Many of them will not initially realize the scale of what is about to happen.
- If your event warrants federal assistance, that process to obtain it will be initiated by your local police.

Do's and Don'ts, continued:

- Work to your strengths & let your partners work to theirs.
- You may have limitations imposed on your event that you can't control. Be flexible.
- Find creative ways that your departmental and external partners might make money.

Words of advice:

- Remember that what you are doing is creating a temporary community. Your audience will remember that feeling for just as long as they remember the eclipse.
- Try to make your event as fun as possible for the people attending who aren't interested in the eclipse.
